- Bash

Relevant Experience

Iron Yard Capstone - Blue Mirror / Back-end Developer
March 2017, Durham, NC

Mobile-first web app that allow users to track their mood and take notes in a journal. As the back-end developer, I set up user log-in through Google and Facebook, persisted and linked user entries in PostgreSQL, and wrote automated tests of the app's functionality. I also assisted with setting up Angular controllers and templates on the front-end.

Work History

Target / Backroom Team Member
June 2013 - January 2017, Durham, NC; February 2018 - Current, Charlottesville, VA

Assisted customers with locating products throughout the store. Worked with visiting vendors to set up demo booths. Restocked products and maintained stock accuracy using a PDA. Handled receiving and shipping of online orders.

Education

The Iron Yard / Certificate
Back-End Engineering
January 2017 - March 2017, Durham, NC

Twelve week immersive course focused on career skill training with intensive curriculum on Ruby, Sinatra, Rails, and PostgreSQL. Built multiple interactive web applications using these skills and tested those applications with RSpec, Minitest, Capybara, and Selenium. Developed several projects alone as well a part of a team.

Durham Technical Community College
Software Development
September 2016 - December 2016, Durham, NC

Studied re-creating websites with HTML and CSS, programming basics in PHP, and Java fundamentals focused on data sorting and filtering.
